Bret,

You may already have copies, nevertheless, included some maps of sampling results and the site overview that may be helpful. The maps hopefully will help illustrate extent of contamination in reference to the COD area.

Subject: Lane Plating Removal Assessment Phase II - Figures

Gentlemen,

Figures for Lane Plating are attached. The figures have analytical data from both sampling events. It appears contamination is pretty shallow, with only a few grids with contamination at the 12" – 18" interval.
